IFC to Issue Microfinance Bond Via Daiwa to expand access to the financial services for poor and contribute to poverty reduction

Tokyo, Japan, March 29, 2013—IFC, a member of the World Bank Group, and Daiwa Securities Group today announced plans to issue a Microfinance Bond that will expand access to finance for poor and low-income entrepreneurs in developing countries.

Microfinance has built a clear track record as a critical tool in the fight against poverty and has entered the financial mainstream. Yet it still reaches less than 20 percent of its potential market among the world's three billion or more poor. More private investment is needed to allow a greater number of poor people to gain access to the financial services they need, to fulfill their business potential, and to build a better life.

IFC focuses on creating and supporting commercially viable microfinance institutions that can attract the private capital needed to scale up and respond to unmet demand. IFC aims to use its leadership in commercial microfinance to increase the outreach of local institutions and help more poor people worldwide to access financial service.

IFC has three times issued microfinance bonds successfully for Japanese investors, in November 2009, in September 2010 and in November 2012, and raised the total amount of US\$ 745 million. The forth issue will be arranged and distributed by Daiwa Securities Co. Ltd. to Japanese retail and institutional investors same as previous issue. IFC will invest an amount at least equal to the proceeds of this bond to support microfinance activities. Through investments in microfinance bonds, Japanese investors will contribute indirectly to reducing poverty.

Daiwa Securities Group actively pursues its commitment to social responsibility by undertaking Impact Investment initiatives, and microfinance bond is one of such initiatives of Daiwa.
