(Reference) Results for the fiscal year ended March 31, 2013	282,409	10,169	7,673	1,804	4.83

2. Reasons for Revisions

Our operations made significant headway as the Japanese economy steadily soared and the U.S. economy continued to gradually pick up steam during the first half of this fiscal year. We expect the global economy to remain on the path to recovery for the rest of this fiscal year despite potential pitfalls that may lie along the way. Working against this backdrop and in light of our projection that steady orders will keep overall performance up during the second fiscal half, we have decided to revise our consolidated forecast for this fiscal year based on our best estimate of the total impact current market factors will have on our operations. The revised consolidated forecast for the fiscal year ending March 31, 2014 is as shown below.

(Note) The business forecasts contained in this press release are made based on information available as of the date of the announcement. The actual results may differ from the forecasts due to various factors.
